

HR33 Marlin Corded

General Purpose Handheld Scanners

Features

Performance and Elegance

The HR33 Marlin boasts a stylish design that is not only well-balanced and comfortable to hold but also looks great. It is an example of Newland taking pride in matching performance with beauty.

Adaptable to your needs.

The HR33 Marlin is the first in the portfolio to include advanced Scripting for programming intricate commands. Easyset is still available to those familiar with the program, but adding Scripting allows even finer detail, making the HR33 Marlin series the best in class.

High Performance

The HR33 Marlin Corded has a laser aimer for accurate barcode scanning and a megapixel sensor to capture various types of barcodes, even if they are damaged or distorted. This makes it ideal for high-density workloads.

Acuscan

Laser aiming with Acuscan is an optional feature that allows you to hone in on the code you want, even if barcodes are printed closely together.

Hands-free Scanning

The HR33 Marlin Corded scanner offers various hands-free scanning stand options. The first option is the intelligent adjustable auto-sense stand, which can be adjusted from an upright position to a flat one, making it suitable for desktop and wall-mounted use. The second option is the gooseneck stand, which provides a flexible design to adjust to your preferred scanning distance and angle.

Be confident with Newland

The HR33 Marlin's IP52 and 1.5m drop specification are backed up with a trustworthy 5-year warranty. Select the HR33 with confidence, knowing that Newland has created a scanner that's up for the job no matter the environment.
